SUMMARY

Full-stack developer who has designed, built and shipped real products to production. I combine engineering (Python/Django and React/TypeScript) with UX/UI, product design and digital marketing. My flagship work is **OMSTA**, an ERP in daily production use at a travel agency, and its React Native mobile app, both built single-handedly.

EXPERIENCE

Full-Stack Developer — CristegnoViajes SRL (OMSTA)

Feb 2025 – Present

Dominican Republic

- Single-handedly built **OMSTA**, a web ERP **used daily by 15 users**: bookings, CRM, payments, double-entry accounting, payroll and branches.
- Automated the **sale → payment → NCF invoice → journal entries → DGII tax reports** cycle (606, 607, 608 and 623).
- Built the team's **mobile app with React Native, Expo and TypeScript**, plus its REST API with per-device JWT: 54 screens and 94 endpoints, tested on Android.
- Backend in **Django, Django REST Framework, PostgreSQL, Redis and Django Q2**, with an end-to-end typed OpenAPI contract, a 3,164-test pytest suite and continuous deployment to Railway via GitHub Actions.

Web Developer & Designer — Freelance

Ongoing

Dominican Republic

- Designed and built **an artisan-soap e-commerce for a real client** and a bilingual photography portfolio, from requirements and UX/UI to deployment.
- Owned **requirements gathering, UX/UI, development and responsive optimization** through final delivery.

SELECTED PROJECTS

- Delicaté 4.0 — Artisan-soap e-commerce & brand site (live, client project)**. Rebuilt the store in React 19 and Django 5.2: admin-managed catalog, account-free cart that syncs with live prices and stock, and a pre-filled WhatsApp order. Shipped as a single Docker container on Railway (PostgreSQL, custom domain, pre-deploy migrations, health-checked releases) with CSP, rate limiting and 18 automated tests in CI.
- Network 3.0 — Full-stack social network (live demo)**. Rewrote a Django coursework monolith as a versioned REST API and a React + TypeScript SPA: cursor-paginated feed, JWT with refresh rotation, reposts and quotes, hashtags, mentions and eight notification types. 132 automated tests, CI and Docker; deployed on Railway.
- Wiki Universe — Content-exploration experience**. Content architecture and clear themed navigation; full-stack.
- Izak's Photos — Bilingual photography site (live demo studio)**. Rebuilt in React 18 and Django 5.2: a 42-photo filterable gallery with shareable links, a keyboard-accessible lightbox and API-backed booking requests with rate limiting. Cut gallery image weight by 74% with WebP previews; shipped to Railway as a single service with CI.

SKILLS

Core: Python, Django, Django REST Framework, React, TypeScript, PostgreSQL, Redis

Mobile: React Native (cross-platform), Expo, Expo Router, EAS Build, TanStack Query, Android

Frontend & product: Next.js, Tailwind CSS, HTMX, UX/UI, Accessibility, SEO

Infrastructure & quality: Railway, Docker, Vercel, GitHub Actions, pytest, Playwright, OpenAPI, REST APIs

Design & creative: Figma, Photoshop, Lightroom, Photography, Art direction, Digital marketing

EDUCATION

- CS50x & CS50W** — Harvard University (CS50). Certificates completed, 2023–2024.
- Digital Marketing Program** — EducaciónIT and Manhattan University. 207 hours, 2024.
- Multimedia Design** — Complementary creative training, approx. 1 year.
- High School Diploma, Humanities & Modern Languages** — Ministry of Education (MINERD), Dominican Republic, 2024.
